

An important function of the CWD is to provide support for women entrepreneurs. Since 2007, the Center for Women and Development has held many activities to support businesses in building capacity during their start-up stage and develop their enterprise further. The CWD organizes conferences and forums to develop policy and increase access to national and international markets through information fairs. Women entrepreneurs request information on topics such as management experience lessons, business culture, fashion, travel, and health care. CWD also support women's access to business information and to products, markets, and customers.

In this work CWD meet the direction of the Presidium of Vietnam Women's Union to support the integral development of women in all areas of Vietnamese society including education, training and successful business enterprises.
